SPEAKING TOPICS

TECHNICAL

✓ *AI, Machine Learning, Data Science, Big Data*

✓ *Statistics, Applied Mathematics, Software Engineering*

NONTECHNICAL

✓ *Leadership and mentorship*

✓ *Overcoming double minority (intersectionality) status*

ABOUT

Tobi Bosede is an artificial intelligence (AI), machine learning (ML) and data science expert. She is well-versed in big-data tools such as Spark, AWS, Docker, and Kafka, along with statistics and software engineering, speaking frequently on these topics at tech events including PyCon, Strata, and Mavens I/O.

Tobi holds a master's degree in applied mathematics from Johns Hopkins University. She is passionate about leading high-impact initiatives and solving complex technical problems, bringing cohesiveness to project teams by focusing on effective communication and working seamlessly across functional groups. She has built predictive systems for Fortune 500 companies, generating billions in revenue and receiving multiple patents.

Currently, Tobi leads Ilekun Health, a tech startup that she founded to help patients make sound health-care decisions. The company uses AI and ML to gather information on provider services, prices, and quality from vast troves of complex, unstructured data.

Tobi is Nigerian-born and a Jersey native. She is a fellow of the American Association of University Women and a board member of the nonprofit Penn Probono Advisory Consulting (PennPAC). She is currently writing a book on AI for a major publisher.
